Greenfield Contractors has completed millions

Dual Conveyor Capabilites

FILLING AT UP TO 80,000 BUSHEL PER HOUR

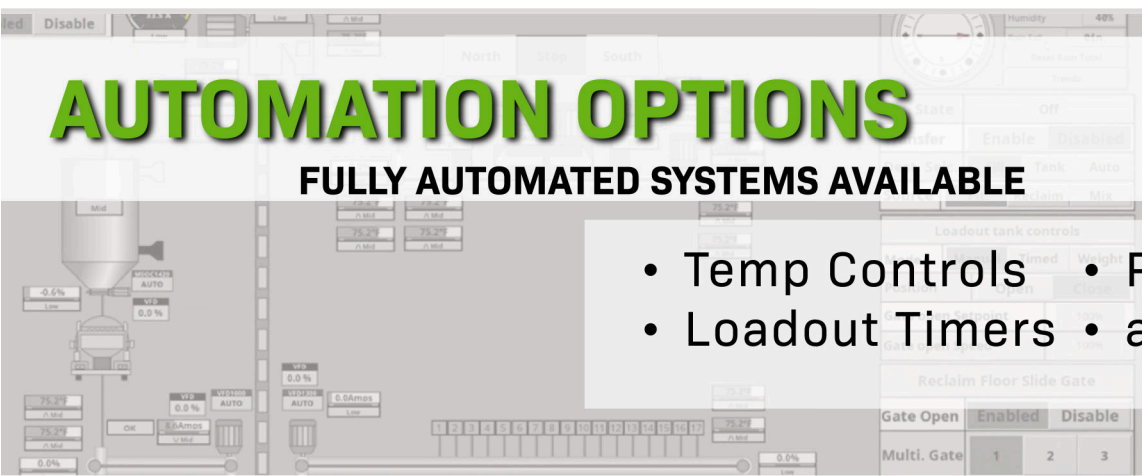

Our Dual Conveyor System slashes customer wait times.
More speed. More bushels received.
Virtually eliminates downtime.

Fabric Building Grain Storage Has Evolved!
Are you ready for the next generation of grain storage?

AUTOMATION OPTIONS

FULLY AUTOMATED SYSTEMS AVAILABLE

- Temp Controls
- Plow Positioning
- Loadout Timers
- and more!

UP TO 8 TEMPERATURE CABLES PER TRUSS!

ELITE KEDER SYSTEM

INDIVIDUAL BAY COVERS

Enhanced weatherproofing for fabric building applications.

Heavy Duty In-Floor Aeration

DURABLE & CONVENIENT

Keep your grain cool, dry, and protected with in-floor aeration. Ideal for flat storage, it pushes air up through the grain to cut spoilage and pests while saving energy.

The flush design supports heavy machinery for easy access and maintenance.

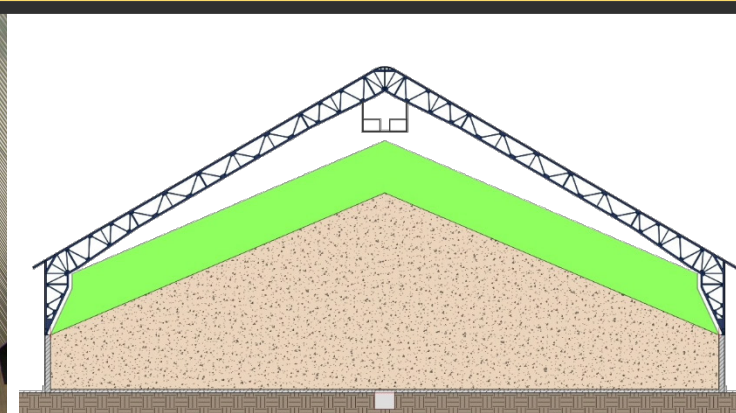

of bushels in grain storage projects including ethanol plants, country elevators, and port facilities.

HarvestGuard 360

Grain Wall System

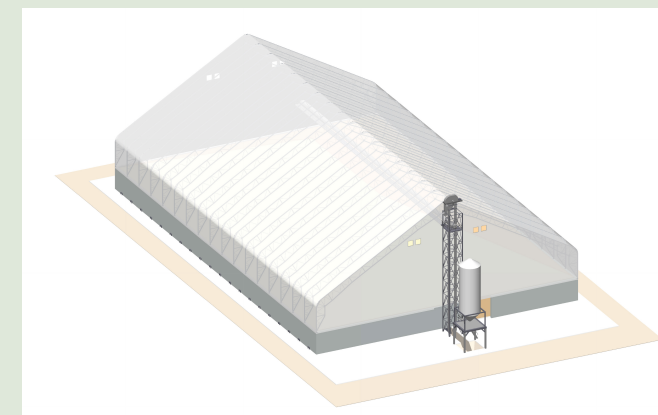

Boost your storage and increase your ROI

FABRIC STRUCTURES

- Aeration: Flush Floor & Above Ground
 - Hot-Dip Galvanized Structure
 - Individual Keder covers
 - Multiple Profile Options
 - Natural Lighting
- Non-Grain Storage Opportunities
 - 120-240ft Wide
 - 25 Year Warranties
 - Concrete Foundations
 - Catwalks & Towers
 - Conveyors & Legs
 - Pit or Tunnel Reclaim
 - Load Out Bins

CALHOUN

HEAR FROM OUR CUSTOMERS

"We have numerous other buildings that have been project managed and installed by Greenfield Contractors, and after seeing how they handle the high winds and storms of Central Iowa, we didn't want anyone else to do the job. The Calhoun Structure is incredible and highly engineered. I would recommend Greenfield Contractors and Calhoun Super Structure for your next project."

~Kevin Rice, Location Manager, New Cooperative Inc.

Underground Reclaims

UP TO 60,000 BUSHEL PER HOUR OUTPUT

Streamline your grain operation with underground reclaim systems that maximize output, minimize handling time, and reduce labor needs.

VENTED EAVES

IMPROVING AIR FLOW & REDUCING SPOilage

Greenfield's vented eave system is engineered to do more than just move air - it's designed to protect your grain. Our vented eave system keeps your grain fresh!

WHY CHOOSE GREENFIELD?

Our commercial and agricultural projects include both new construction and repairs/restorations. We work with you even in occupied and fully operational job sites. We can also plan, manage, and build multi-phase jobs. We work with manufacturer and designers to produce long-lasting, functional structures. Call us today and bring our project management skills and extensive construction experience to your next project.

GENERAL CONTRACTORS

CONCEPT & DESIGN: This phase brings your vision to life through collaboration and smart planning. We tailor each design to your needs, blending function, and sustainability. It's where great buildings begin.

CONSTRUCTION & PROJECT MANAGEMENT: Working with trusted suppliers in our industry, we keep them accountable to our standards throughout the entire build. From sequence to production and quality control, we stay focused on the goal. With constant monitoring and interaction, we keep an eye on budgets to ensure the lowest costs and stay on top of schedules for timely delivery.

COMPLETION: The last step in any build. This phase includes site cleanup, systems training, and final inspections. After completion, we perform a final walkthrough to ensure your complete satisfaction and help you with warranty paperwork.

Greenfield Contractors takes your structure from start to finish. Our specialties include fabric structures, especially in the ag industry. No matter what your needs are, we have you covered. We can handle every step in your project.

- Design
- Fabrication
- Concrete Work
- Building Construction
- Millwright
- Grain Handling
- Automation
- Grain Conditioning
