

FABRIC GRAIN STORAGE FACILITIES BUILT FOR COMMERCIAL SCALE

**Integrated fabric storage systems
engineered for capacity, throughput,
and long-term operational performance.**

WHY CHOOSE GREENFIELD

Full-Scope Coordination

From design through construction and operational integration, Greenfield manages complex grain infrastructure projects with accountability at every stage.

Built for Real-World Conditions

Facilities engineered to withstand high winds, heavy snow loads, corrosive environments, and continuous operational demand.

Operational Performance

Designed to maximize throughput, reduce handling time, support harvest efficiency, and minimize downtime risk.

Long-Term Asset Protection

Infrastructure is focused on lifecycle durability, operational reliability, and protecting longterm capital investment.

CAPABILITIES

Grain Handling & Throughput Systems

- ✓ Dual conveyor systems
- ✓ Underground reclaim systems
- ✓ Loadout integration
- ✓ Catwalks & tower systems
- ✓ Pit and tunnel reclaim

Storage Infrastructure

- ✓ Large-capacity fabric grain storage
- ✓ Clear-span storage environments
- ✓ Grain conditioning systems
- ✓ Aeration systems
- ✓ Expansion-ready configurations

Facility Integration

- ✓ Concrete
- ✓ Millwright services
- ✓ Automation systems
- ✓ Site coordination
- ✓ Multi-phase construction

Operational Technology

- ✓ Automation controls
- ✓ Loadout timers
- ✓ Temperature controls
- ✓ Plow positioning
- ✓ Monitoring systems

PERFORMANCE METRICS

**Up to
80,000**

Bushels Per Hour
Fill Rates

National Coverage

Midwest Expertise

**Up to
60,000**

Bushels Per Hour
Reclaim Output

Multi-Phase

Scalable Expansion
Opportunities

**Several

ENGINEERED FEATURES

Preserve Grain Quality

Designed to improve
airflow and moisture
management throughout
the storage cycle.

Streamlined Material Flow

Integrated reclaim systems
reduce bottlenecks and
support faster grain
movement.

Harvest-Ready Throughput

Supports high receiving
speeds during peak harvest
windows.

PROJECT DELIVERY APPROACH

Client Testimonial

New Cooperative: Churdan Grain Storage Facility

"We have numerous other buildings that have been project-managed and installed by Greenfield Contractors, and after seeing how they handle the high winds and storms of Central Iowa, we didn't want anyone else to do the job. The structure is incredible and highly engineered. I would recommend Greenfield Contractors for your next project."

- Kevin Rice, New Cooperative

Why Commercial Operators Choose Fabric Storage

- ✓ Large storage capacity in a smaller footprint
- ✓ Faster expansion opportunities
- ✓ Integrated material handling systems
- ✓ Scalable future growth
- ✓ Operational flexibility
- ✓ Lower cost-per-bushel in many applications
